

VENICE SYSTEM

 **imesa**

IMESA is the leading Italian company in the production of laundry machinery.

We achieved this goal thanks to 40 years of a total commitment to the continuing challenges to satisfy the **growing technological expectations** of human beings and meeting the changes in lifestyles.

INVEST is the entrepreneurial spirit of IMESA: looking at the markets and understanding their needs, contributing to safeguarding the environment, offering a qualified customer assistance. Lifestyles change and fashion changes too. Men's & Women's suits are being replaced with casual clothing made from new types of fabric.

Due to the demand for an ecological wetcleaning system suitable for all kind of fabrics, IMESA continued investing and researching, until developing the VENICE system.

VENICE is QUALITY. As the first laundry machine manufacturer to obtain the UNI EN ISO 9001, we design and manufacture our creations faithfully respecting the parameters of reliability, efficiency and solidity.

VENICE is SAFETY. The quality of our products is certified by qualified operational organisations in various parts of the world; safety in the working places and of employees; safeguard of the environment.

VENICE is SERVICE, qualified, on time, innovative. Our qualified customer assistance includes a complete service from specific design solutions to the selection of products with the support of **SO.LAUNDRY**, the new consultancy software, to the "**Remote-control service**" which guarantees just-in-time solutions for any problems that crop up. Commercial and technical refresher courses complete IMESA's excellent service.

VENICE is RELIABILITY: 24 months Warranty on all IMESA machines. By activating the Remote-control service the guarantee starts **from the date of installation**.

VENICE is VERSATILITY, flexibility that allows many possibilities for customisation, a wide array of models for any needs, functions and budget.

With VENICE starts the WETCLEANING age.

Venice is the **ecological** cleaning process, a non-toxic environmentally system.

It is a gentle cleaning solution for all kind of fabric and fiber types, the evolution alternative to dry-cleaning. The use of computer-controlled washing machines with inverter, biodegradable soaps, tumble dryers with humidity control and specific finishing equipment assures excellent results, better than previous systems.

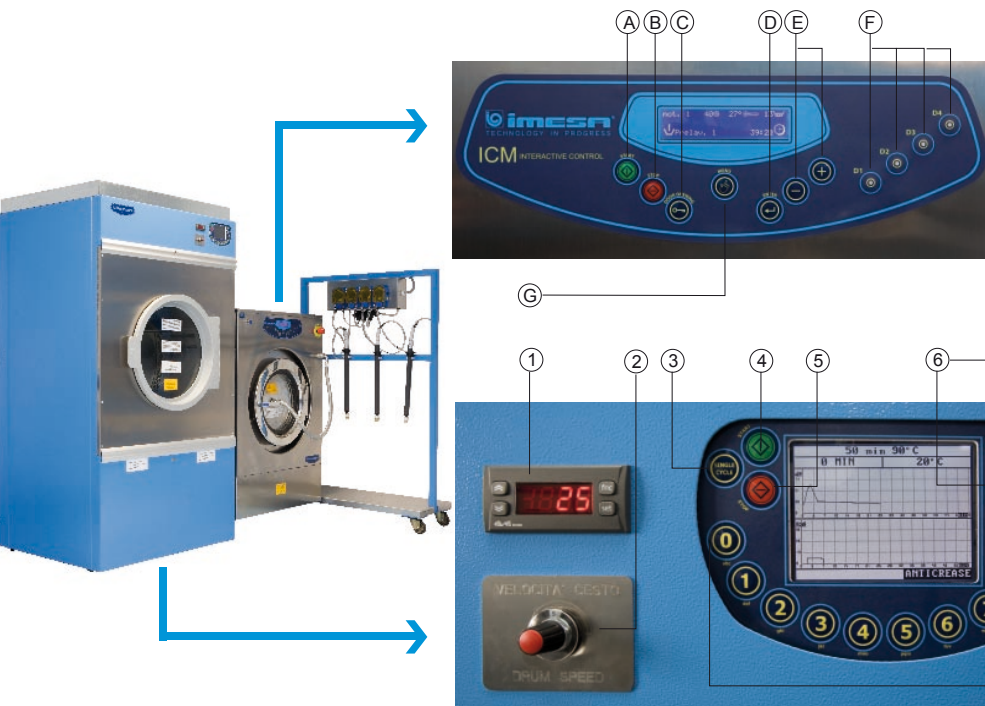

The environmental, safety, and health impacts associated with modern machine wet cleaning are less than those associated with traditional dry cleaning solvents

VENICE, THE CLEANING PROCESS THAT SMELLS GOOD.

Wide Graphic Display

LEGEND for ICM CONTROL PANEL

- A. Cycle start / Soaking selection
- B. Program stop
- C. Door open
- D. Selection of set programs
- E. Quick cycle advancing
- F. Warning lights
- G. 3 functions:
 - Delayed start
 - Parameters selection
 - Modification/Setting-up programs

LEGEND for ICD CONTROL PANEL

- 1. Drum speed rotating display
- 2. Drum speed regulation
- 3. Cycle stop
- 4. Single cycle
- 5. Cycle start
- 6. 2 functions:
 - Start menu
 - Programming parameters
- 7. Command confirmation
- 8. Memorized programs

FROM ICM WASHING MACHINE, the cradle of garments...

The IMESA High-Spin washing machine is equipped with:

- Inverter for the control of **drum rotation**, washing and spin speed.
- Programmable microprocessor with wide graphic display.
- Detergent pumps

ICM washing machine works at low temperature to avoid thermal shock to fine fabrics and it is available with electric heating or indirect steam.

On request, the ICM model can be equipped with a **water re-circulation pump**, an IMESA exclusivity that allows a **better water distribution** inside the drum and **less water /soap consumption**.

The ICM model is arranged for connection to PC for a precise control of working parameters also changeable during the cycle. Setting and modification are visible on display.

With **Remote-control Service** each machine is in constant dialogue with IMESA technical stations, constantly updating washing programs and preventing machine down time with just-in-time solutions for any problems.

... TO ICD TUMBLE DRYERS, the dry specialist ...

The perfect warm/air combination to dry every kind of fabric.

The IMESA tumble dryer is equipped with:

- Programmable microprocessor with wide display
- Drum speed rotating control with graphic display
- Drum reversing timing control
- No-wrinkles program

Inside the ICD drum there is proper humidity detector to control the residual humidity. The air-drying temperature is adjusted on the base of the humidity recorded. The parameters change according to the different steps of cycle.

The ICD tumble dryer is equipped with a wide display showing the real progress of drying cycle and of temperature, allowing prompt operation in case of anomalies. The display works in case of both automatic and manual cycles.

At the end of the cycle it is possible to print a report for the final customer giving various information about the drying program used, day, hour and duration of cycle, temperature and humidity and operator name. A quality service for demanding customers.

...other system components, great results!

The ICF form finisher and the ICT trousers topper guarantees superior quality of finishing for wetcleaned garments forming their shape, eliminating wrinkles, while complete removing residual humidity with superheated air.

ICF TENSIONING FORM FINISHER

The ICF tensioning form finisher is suited all models of jackets and coats of any kind of fabrics with automatic height adjustment. The shoulders are manually adjustable. Simply and intuitive control board with up to 10 different programs of steam/air time. It is equipped with an all-steam iron for touch-ups and wooden sleeves expanders.

ICT TROUSERS TOPPER

The ICT trousers topper for ironing of creased and uncreased trousers of any fabric and size. With front to back tensioning of waistband and pleat paddles. Simply and intuitive control board with up to 10 different programs of steam/air time.

ICB IRONING TABLE

Essential instrument for the finishing process. The ICB table is complete with utility shape for the ironing of both jackets and trousers and equipped with ironing sleeve shape and electric-steam iron. It is a vacuum and blowing table: a perfect combination for a correct finishing of garments.

VENICE System is available in different models:

Washing Machine	Half-charge (Kg) (delicate garments)	Full charge (Kg)
ICM 78	7/8	14
ICM 90	9/10	18
ICM 120	11/13	23
ICM 170	16/18	30

Tumble Dryer	Half-charge (Kg) (delicate garments)	Full charge (Kg)
ICD 14	6/7	14
ICD 18	9/10	18
ICD 23	11/13	23

The fashion is changed, change the way to wash!

VENICE is ideal for Laundry Shops, Hospitals, Retirement Homes, Boarding Schools, Hotels and Residence, Theatres, Garments Renting Shops and for all the places where there is the necessity of treating different kind of fabric and of removing any kind of stain.

IMESA offers a program-package for any kind of fabric; moreover the versatility of IMESA programs allows to adjust them according to the type of customer.

To better understand the VENICE capability and to learn all the possible working systems, IMESA offers a training pack that supports the final customer throughout the working steps.

The complete VENICE System is available in our Show Room and by our distributors.

Our Sales Department is always at disposal for visits and appointments.

CERTIFIED QUALITY

Venice System: the Environmentally Green Process!

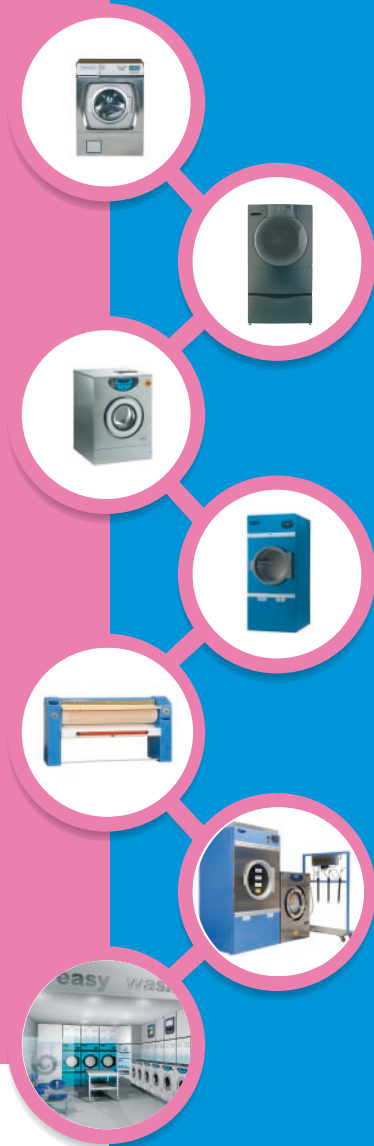

VENICE SYSTEM, WHY PREFER IT?

- Because is environmetally green
- Because of the **excellent results**: clean garments with total stain removal, softness of fabrics, nooffensive chemical odor, perfect fit with no signs of shrinkage, no static or lint.
- Because all VENICE components are **easy-to-use** and are **computer-controlled** for specific programs according to the different kind of fabric.
- Because of the **commercial advantages**:
 - lower start-up capital costs
 - water cleaning process for all kind of fabric at low production costs
 - washing / drying / ironing complete cycle within the workday
 - low water consumption
- Because even if IMESA suggests specific soaps for an excellent results, VENICE programs are **suitable to ALL detergents** for wetcleaning

Imesa organizes training courses by distributors' showrooms to demonstrate and to teach how to correctly use VENICE machines. The training includes a second meeting at customer's facility to adjust the working programs according to customer needs.

Venice System: for today and for tomorrow.
